

TTCOIN

TC Token Whitepaper v2

ENGLISH

INTRODUCTION TEXT

TTcoin was created by its founders **Tayfun Taner** and **Tunahan Taner** as a **TRC20** token on the Tron infrastructure on **March 24**, 2021 to be used as a payment method in TTcoin projects.

The TTcoin team, which collected information for the project until June 2021, started cloud mining for Android phones on June 16.

As soon as cloud mining started, it reached more than 10 thousand users in the first day. Within 2 months, it had 1 million active users.

The main purpose of the TTcoin team is to use TTcoin as a payment method in many institutions and organizations that they will establish in 2022.

TTcoin, which made its first listing on the Indian stock market, has managed to be listed on 5 different stock exchanges in 1 month.

The TTcoin Team, whose goal is to be listed on 1 stock market in each country, is working to announce its 2022 projects in the Global.

It has become a token of interest in a short time in every field, including social media accounts.

The puppy wolf and TC symbol in its logo were liked by some viewers.

BASIC KNOWLEDGE

TTcoin offers real and tangible projects to its users and investors, unlike most fake and futureless tokens.

Since its infrastructure is Tronscan, our only security infrastructure is protecting the security of our wallets, social media account security and every project information in the TTcoin ecosystem.

Our cloud mining application TTcoin Network keeps user data in the most secure way in Google infrastructure. User data is displayed in encrypted form in our infrastructure, not to be shared with a third company or person.
